GUIDELINES
FOR PRIMARY FOREST PRODUCTS
NEGOTIATING AGENCIES
under REGULATION 82-189

(Beginning on, or before December 1st each year and concluding the following June 15th. Extending or condensing these time frames may be carried out with the approval of the Commission.)

INTRODUCTION

The Negotiating Agencies Regulation (Regulation 82-189) consolidates the 7 similar regulations (and the 7 amendments to them) which were first used in January 1978. **The following GUIDELINES were written to assist persons, appointed to a Negotiating Agency, in understanding and using Regulation 82-189**. The Negotiating Agencies Regulation provides a vehicle by which an agreement may be reached in a reasonable and rational way.

Each Negotiating Agency should follow the Forest Products Marketing Boards Negotiating Agencies Regulation 82-189 - Farm Products Marketing Act. Reference is made throughout these GUIDELINES to the relative sections and sub-sections of Regulation 82-189.

Therefore, each Licensee and each Sub-Licensee is required to negotiate and complete an agreement with each of the Forest Products Marketing Boards they purchase wood from before the New Brunswick Forest Products Commission may recommend (within rulings relative to these GUIDELINES) that an allocation of Timber from Crown lands, to the Licensee or Sub-Licensee, may be approved for the operating season of the next year.

It is a policy of the New Brunswick Forest Products Commission, as of December 11, 1991, that if a negotiating agency with an independent sawmill (sub-licensee) is not established by either party prior to January 31st then the Commission will not establish one.

INTRODUCTION

The intent of this Regulation is to have every Wood Processing Company (whether a Licensee, Sub-Licensee or not) negotiate with each Forest Products Marketing Board within the Company's normal wood purchasing area.

Requests for DELAYS extending beyond April 1st must consider a Company's access to primary forest products on Crown lands. In approving such DELAYS, the Commission will assume that such access is to be recommended unless the request for the DELAY states otherwise.

It is the Commission's responsibility to notify the Minister of Natural Resources & Energy relative to negotiations. It is also the Commission's responsibility to recommend whether or not each Licensee and each Sub-Licensee **be allowed or denied access to Crown land** timber during the operating year.

Relative to access to Crown it has been a policy of the government and of the Commission that primary forest products from private woodlots should be accepted by a Licensee or a Sub-licensee if it receives primary forest products from Crown land. If the Commission has to determine whether a delivery schedule, for private woodlot wood, is fair or reasonable- each situation is judged on it's own merits and the Commission judges proposed delivery schedules by considering, as one of the factors, the average of the previous three (3) delivery schedules that were agreed upon by the parties when such agreements (of delivery schedules) were reached during regular negotiations.

It should be noted that the Commission will recommend that access to Crown land will be recommended for the Company if neither party (the Company or the Local Board) of a negotiating agency has contacted the other party, relative to negotiating, on or before January 31st. All negotiators, in this regard, should refer to page 17 following.

Addresses of Licensees, Sub-Licensees and Local Boards, etc. may be found in the APPENDICES.

REGULAR NEGOTIATIONS

1. Naming of Negotiating Agencies - please refer to sub-sections 4(1), (2), (3), (4) and (5). Also see the last paragraph on page 17.

In connection with each Forest Products Marketing Board, there is established a Negotiating Agency for each of the processors (manufacturers) in the Province of New Brunswick to whom primary forest products (cut from private woodlots) are normally sold.

If two, or multiple, year agreements are still in effect, parties to the agreement should advise the Commission that the agreement is continuing.

The members of each Negotiating Agency should be appointed, or named, as early as possible each fall. Important regions of each Regulated Area should have representation on each Negotiating Agency from both the processors and producers.

Relative to each Negotiating Agency, each producer's organization and each manufacturer's organization is required to notify the Commission of the name or names, and addresses of their negotiators - see Sub-section 4(2) and (3) - or the status of their agreement - **not later than December 1st in each year**.

If a member of a Negotiating Agency cannot act for any reason and is not replaced, procedures are outlined for a replacement - see Sub-section 4(4).

Other persons may attend the negotiation meetings if the majority of the members of each party jointly agree that they may be present.

Points made in the **INTRODUCTION**, pages 1 and 2, should be reviewed.

2. Preliminary Meetings of a Negotiating Agency - please refer to Sub-sections 5(1), (2) and (3).

Each Negotiating Agency, when formed, may start negotiating. **An early fall meeting is suggested**. Nonetheless, **the first meeting of negotiation shall be held on or before the end of the first full week of January**. The Commission agrees that this meeting or meetings be termed **"PRE-NEGOTIATION"** meeting(s).

Copies of notices of meetings should be sent to the Forest Products Commission at it's address on page 17.

REGULAR NEGOTIATIONS

It is recommended that at least the following matters be considered first at the "PRE-NEGOTIATION" meeting(s).

1. Name a spokesperson or contact person, for each party, if this has not already been done. Normally, the spokespersons conduct the negotiations. Either party may caucus at any time for private discussion.

2. Review existing agreements, clause by clause. Written notices concerning desired changes in the language of the agreements should be exchanged before the first meeting.

3. Consider long term agreement - i.e. 2, or more, years.

4. Review the Department of Natural Resources & Energy (DNR&E) allocations of wood to be purchased by Licensees and Sub-Licensees from Forest Products Marketing Boards. (Available from Regional Resource Managers--address, etc. in Appendix "G").

5. Discuss time limitations for negotiations.

6. Discuss primary forest product volumes - short and long term.

7. Consider using "Final Offer Selection". This is a procedure which, with the agreement of both parties in a negotiation, may be used at the ARBITRATION stage to settle a deadlock. In such a case, both parties submit their "Final Offers" to the ARBITRATIONS BOARD. The BOARD selects one of the offers, as best for all concerned, and this becomes binding in total on both parties (Also see page 18).

8. Realize the need for each party to sign off matters agreed upon; and

9. Propose names of conciliators to the Commission.

The foregoing suggestions are not intended to limit the matters that may be considered.

Prior to the adjournment of this first meeting of negotiation, and each subsequent meeting, a short, joint statement summarizing the meeting should be written out and initialled or signed by the spokesperson, or contact person, for each party. It is always important that each party understand what has been agreed upon, as well as what has <u>not</u> been agreed upon.

Subsection 5(3) may be disregarded for the time being since the Commission only requires a report to be filed when agreements are reached.

3. Succeeding Meetings of a Negotiating Agency - refer to subsection 5(1), (2) and (3).

A Negotiating Agency is empowered by the Farm Products Marketing Act, on behalf of the processors and the producers, to settle by agreement any matters in sub-paragraphs 6(5)(a)(i), (ii), (iii) and (iv), quoted below, from the Farm Products Marketing Act (see Act - pages 13 and 14), relating to the marketing of the regulated product. The regulated product may be any or all primary forest products originating on private woodlots (ie "any unmanufactured product of forest trees of hardwood or softwood species except coniferous trees cut for sale as Christmas trees and except products from the sap of Maple trees".

A final agreement may be subject to ratification by the Local Board or by the Company providing that this is clearly stated at the meeting.

Matters to be settled by agreement include, but are not necessarily limited to the following:

(i) minimum prices for the regulated product or for any class, variety, grade or size of the regulated product;

(ii) quantity, delivery schedules and dates for delivery of the regulated product;

(iii) any charges, costs or expenses relating to the marketing of the regulated product; and

(iv) terms, conditions and forms of agreement relating to the marketing of the regulated product.

All parties must press for agreements by February 1st each year.

Again, the Forest Products Commission should be notified as soon as possible after an agreement is reached.

CONCILIATION

4. Matters in dispute prior to February 1st - refer to subsections 5(1), 6(1), 7, 8(1) and (2), and 13.1.

Section 7 reads as follows: "Notwithstanding subsection 6(1), the Commission may at any time after the commencement of negotiations, at the request of the Local Board or the processor, submit any matter referred to the negotiating agency under subsection 5(1), to a Conciliator".

A request for Conciliation, a Delay, or Arbitration will not be considered by the Commission until a copy of the previous year's Signed Agreement has been filed with the Secretary of the Commission.

The request for Conciliation should be by letter and should spell out the position of the party making the request. The request should be addressed to the Secretary of the Commission whose address is noted on page 17.

The party making the request should also notify the other party by sending a copy of the letter of request to the spokesperson, or contact person, of the other party.

In practice, some negotiating agencies have reached agreements shortly after February 1st. **The Commission encourages early settlements without Conciliation - ie without having a third party enter the negotiating process.**

If a DELAY is anticipated, both parties are required to agree to, and make a request for, a DELAY to the Commission. DELAYS have to be approved by the Commission - **(see subsection 13.1).**

Requests for DELAYS extending beyond April 1st must consider a Company's access to primary forest products on Crown lands. In approving such DELAYS, the Commission will assume access to Crown for the Company is to be allowed unless the request states otherwise.

5. Matters in dispute on or after February 1st - refer to subsections 6(1) and (2), and 13.1.

Subsection 6(1) reads as follows: "Where the Negotiating Agency has not arrived at an agreement respecting all matters that it is empowered to settle by agreement, by the first day of February in each year, the Commission shall be so notified and the dispute shall be submitted to a conciliator appointed by the Commission."

Therefore, a letter or FAX stating: 1. the items not agreed upon, and 2. whether or not conciliation is requested; must be sent so as to reach the Commission within five working days of February 1st each year.

The Negotiating Agency may notify the Commission prior to February 1st if it foresees that no additional meetings of the Negotiating Agency are possible before that date. It is requested that this notification also be by letter and signed by the spokesperson for each party of the Negotiating Agency. This letter of notification should state those matters remaining in dispute. It is important that each party have a clear understanding of the matters that have not been agreed upon, as well as the matters agreed upon.

The letter of notification should be addressed to the Commission whose address is noted on page 17.

6. The meeting of conciliation - refer to subsections 6(2), 8(1) and (2), and 13.1.

The Commission plans to appoint conciliators at it's meeting scheduled approximately one week after February 1st of each year. The Commission will notify both parties by sending each of them a copy of it's letter appointing their conciliator.

The conciliator should normally choose a neutral location for the meeting of Conciliation and select a mutually convenient time and place. Time is of the essence in these circumstances. The importance of full and complete details is also emphasized.

Guidelines for conciliators are as follows:

(1) Arrange a meeting with both parties as soon as possible.

(2) Choose a neutral location for the meeting. Utilize government facilities if at all possible and appropriate.

(3) Receive a clear statement - signed by all representatives (present) of both parties - of the matters agreed upon and the matters not agreed upon, prior to conciliation.

(4) Endeavour to get the two parties to reach an agreement.

(5) Conciliations must be completed within three weeks of the date of the appointment of the conciliator.

(6) When agreements are reached during conciliation, write them out in a clear and detailed manner and have the spokesperson or contact person, for each party, initial each item agreed upon.

(7) At the conclusion of the conciliation, prepare a detailed and clear statement of the position of each party and have the spokesperson or contact person, for each party, sign their party's position statement.

(8) Prepare:
(a) RECOMMENDATIONS, and
(b) your report for the Commission.

Your report and RECOMMENDATIONS must be filed with the Commission within three weeks of your appointment. Your report and RECOMMENDATIONS will be treated as confidential by the Commission. Your RECOMMENDATIONS and report should be according to a format recommended by the New Brunswick Forest Products Commission, a copy of which will be sent to you.

(9) Delays in Conciliation (beyond the third week) may be requested by a conciliator and may be approved by the Commission provided both parties first agree to the delay, and

(10) Submit a statement of your time and expenses, for each conciliation, to the Commission.

ARBITRATION

7. <u>Requests for Arbitration</u> - refer to subsection 9(1) and (2), 10(1) and (2), 11(1) and (2), 12(1) and (2), 13 and 13.1.

The Negotiating Agencies Regulation states that either party may request Arbitration if the Conciliation process does not result in an agreement.

<u>The request for Arbitration must be in writing and should: (1) state the items for which arbitration is requested; and (2) be accompanied by a detailed statement of the matters in dispute</u>. As a reminder to all, the request should include mention of "Final Offer Selection" even if the requesting party's position is not final on this. This request must be delivered, FAXED or mailed to the Secretary of the Commission, at the address noted on page 17, so that it is received at least three (3) working days prior to March 15th. Delays, if any, must be approved by the Commission.

The party making the request for Arbitration should also notify the other party by sending the spokesperson, or the contact person, for the other party a copy of the letter of request and of the statement accompanying the request. As a reminder, to the Commission, reference to "Final Offer Selection" should also be made at this time.

The Forest Products Commission decides whether or not matters in dispute are referred to an arbitration board. In reaching such a decision the Commission studies the Conciliator's Report and Recommendations. It may request the Negotiating Agency to appear before it in order for the parties to clarify their respective positions, if the Conciliator's Report is not clear.

The Commission may in this instance act as a conciliation board. The Commission may recommend to the Minister of Natural Resources & Energy that a Licensee's or Sub-Licensee's access to primary forest products on Crown lands be allowed, or not allowed, while an attempt is made to settle any matter in dispute by further conciliation. Regulation 84-258 under the Forest Products Act is to be amended in this regard. Points stated in the INTRODUCTION, pages 1 and 2, should also be reviewed again.

Because of the binding nature of an Arbitration Board's Award, a referral to arbitration is regarded as meaning that an agreement will be put in place. Please refer to subsection 12(2) of REGULATION 82-189 and page 11 of these Guidelines - item 8 - "<u>Decision of an Arbitration Board</u>".

ARBITRATION

Under normal conditions the Commission will notify each party within 24 hours of it's decision to refer a dispute to Arbitration.

Again, time is of the essence and the Commission has laid down the following schedule for the various steps in Arbitration:

(1) that each party should name it's arbitrator and so notify the Commission within five (5) working days of receipt of a written request from the Commission to do so;

(2) that the two arbitrators appoint a Chairman and so notify the Commission within ten (1) working days of receipt of a written request - also from the Commission - to do so;

(3) that the Arbitration Board should hold a hearing, to receive the presentations of both parties, within fifteen (15) working days of the Chairman's appointment; and

(4) that the AWARD should be made within ten (10) working days after the hearing is held.

Requests for DELAYS, agreed to by both parties, beyond the foregoing time frames, must state the number of days of delay required and the delay must be approved by the Commission.

Items to be arbitrated upon may include, but are not necessarily limited to, the following:

(1) Price

(2) Volume (according to guidelines subsequently described)

(3) Delivery Schedules

(4) Quality

(5) Specifications

(6) Penalty and Contingency Clauses.

Relative to the determination of the volume to be arbitrated between Marketing Boards, Licensees and Sub-Licensees, the Commission will consider the allocated volumes assigned to each Licensee and Sub-Licensee from each Marketing Board as follows:

A. With regard to the primary source of supply -

The Allowable Annual Cut (A.A.C.) calculated by the Timber Management Branch and/or Marketing Boards is proportionally allocated to Licensees, Sub-Licensees and any other wood processing plants, in or adjacent to a regulated area, on the basis of their total softwood and/or hardwood consumption. Each allocation is considered to be the minimum annual volume to be bought by each Licensee or Sub-Licensee, should the Marketing Board desire to sell such volume, before any Crown wood is made available.

If less than this minimum volume is purchased by a Licensee or Sub-Licensee in any one year, the Forest Products Commission has the authority to increase the allocation to a Licensee or Sub-Licensee mill in subsequent years so that the original allocation will average out over a reasonable period. The policy of proportional reduction below established allocations is discontinued, and

B. With regard to the negotiation and arbitration process -

All issues associated with the bargaining process may be referred to the Forest Products Commission. The Forest Products Commission has the full authority to grant arbitration on any item it deems appropriate, including volume, with consideration of historic precedence.

The Forest Products Commission is also to advise the Minister of Natural Resources & Energy **no later than March 15th** of it's intention concerning a request for Arbitration under the Forest Products Marketing Board Negotiating Agencies Regulation (REGULATION 82-189).

The Forest Products Commission will notify each party as soon as possible of it's decision relative to the request for Arbitration.

It is the intention of the Negotiating Agencies Regulation that the Arbitration process be concluded as soon as possible.

8. Decisions of an Arbitration Board - refer to Subsection 12(2).

The decision of an arbitration board is binding upon both parties. (Reference: the Arbitration Act A-10).

MISCELLANEOUS

9. Definitions

(1) **Allocation** - for the purposes of negotiations under these GUIDELINES, an Allocation is the annual volume of wood or primary forest products assigned to a mill, by the Minister of Natural Resources & Energy, which may be all or part of a marketing board's established allowable annual cut.

(2) **Allowable Annual Cut** - is the annual volume of wood or primary forest products that can be harvested over a stated time period on a specific area of forest land to maintain the forest in perpetuity.

10. General

Members of a Negotiating Agency are to remain members until the 15th day of June each year--see subsections 4(5) and 13.1.

At the conclusion of a Negotiating Agency's negotiating process, **a copy of the agreement must be filed with the Secretary of the New Brunswick Forest Products Commission** by each Negotiating Agency--see subsection 6(6) of the Farm Products Marketing Act.

The **New Brunswick Forest Products Commission** was established in 1971 under the Forest Products Act F-21. Since 1979, this Act has been administered by the Minister of Natural Resources, now the Minister of Natural Resources & Energy.

Regarding primary forest products the Forest Products Commission exercises the powers of a supervisory agency by virtue of the authority set out in subsection 12(2) of the Farm Products Marketing Act F-6.1. This Act came into force on May 15, 1977. It was a major revision of the Natural Products Control Act--1952, and continues to be administered by the Minister of Agriculture. The Commission also has responsibilities inherent in the Crown Lands and Forests Act.

The Forest Products Commission has an independent Chairman and six members--two representing Government (one for the Department of Natural Resources & Energy and one for Agriculture); two representing industries and two representing producers. The Secretary is not a member of the Commission but is one of it's full-time employees.

MISCELLANEOUS

For your information the following Appendices are enclosed:

APPENDIX A: IMPORTANT DATES

APPENDIX B: A map showing the REGULATED AREAS of the seven (7) Forest Products Marketing Boards--dated October 1988

APPENDIX C: A list of addresses,etc. of the Forest Products Marketing Boards in New Brunswick dated June 1991

APPENDIX D: List of Licensees, November 1991

APPENDIX E: List of Sub-Licensees, May 1991

APPENDIX F: A list of Members, etc. of the New Brunswick Forest Products Commission dated October 1991

APPENDIX G: A list of Regional Resource Managers in New Brunswick (Department of Natural Resources & Energy)

APPENDIX H: Other Affiliated Agencies

The object of the New Brunswick Forest Products Commission is to encourage and facilitate the achievement of expanding markets and equitable prices for both the producer (woodlot owner) and processor (manufacturer) of primary forest products purchased from private woodlots. The Commission also oversees the relationship between Forest Products Marketing Boards and forest industry companies.

Prior consultation in 1977 with input from both forest industry processors and private woodlot owners assisted the Commission in the preparation of the Negotiating Agencies Regulation, under the Farm Products Marketing Act. As a result the Regulation is a middle-of-the-road position considering the desires of government, processors and producers.

Processors and producers are required to use the Negotiating Agencies Regulation and these **GUIDELINES** in **good faith** and conduct negotiations accordingly. It is hoped that the credibility of both the processors and the producers can be established with each other where this has not already been achieved.

MISCELLANEOUS

The Commission wants both parties justly treated, financially and otherwise. It will recommend that immediate action be taken to correct situations where injustices to processors or producers exist.

The New Brunswick Forest Products Commission encourages negotiations on a **high plane and in good faith**, especially within the time periods specified in REGULATION 82-189.

Emphasis should also be placed, during negotiations, on the need to salvage merchantable spruce and fir that has been damaged during the budworm infestation. This emphasis should continue during cutting operations.

Emphasis must also be placed on the production of sawlogs before pulpwood. Best end use is to be promoted at all times.

You may reach the Commission as follows:

NEW BRUNSWICK FOREST PRODUCTS COMMISSION
Suite 215, Core Section
Hugh John Flemming Forestry Centre
PO Box 6000
FREDERICTON, NEW BRUNSWICK

Telephone Number: (506) 453-2196
FAX Number: (506) 457-4966

PLEASE NOTE: CONFIDENTIAL CORRESPONDENCE WITH THE COMMISSION MUST BE MARKED "CONFIDENTIAL" ON THE CORRESPONDENCE AND ON THE OUTER ENVELOPE.

BACKGROUND

by J. Ian MacDonald, RPF

Prior to 1977, negotiations between forest industry organizations and private woodlot producer groups (which included 3 Forest Products Marketing Boards), were not always satisfactory to either industry or producer. The New Brunswick Forest Products Commission, established in 1971 under the Forest Products Act, had the responsibility in those days, as it does today, to oversee such negotiations. The producer groups were also concerned about the effect that Crown lands had, as a competitive factor, in the marketing of primary forest products - particularly pulpwood. This continues to be their concern.

In March 1977, the then Minister of Natural Resources, the Honourable Roland C. Boudreau, at a concluding meeting with: the Honourable Malcolm N. MacLeod, Minister of Agriculture and Rural Development; Mr. Peter deMarsh, President of the then New Brunswick Federation of Wood Producers Inc. (Federation); Mr. Peter M. Beyea, RPF, Vice-President of Woodlands, Fraser Inc., and at the time, President of the New Brunswick Forest Products Association Inc. (Association); Mr. V. C. Bastin, RPF, at the time Secretary of the New Brunswick Forest Products Commission; and Mr. E. T. Owens, RPF, then Assistant Deputy Minister of Natural Resources, reached an agreement with all present concerning: (1) a time-table for negotiations; (2) allowable annual cut; (3) Crown cutting rights; (4) proclamation of amendments to the "Natural Products Control Act"; and (5) the Arbitration process. Following this meeting, Negotiating Agencies Regulations for Primary Forest Products were drafted with input from the Federation, the Association and the Provincial Government.

The Negotiating Agencies Regulations were established first in January 1978, for the Forest Products Marketing Boards--Madawaska, North Shore, Northumberland County and York County (now Y.-S.-C.), then later for the Carleton-Victoria, Southern New Brunswick (S.N.B.) and the South East New Brunswick (S.E.N.B.) Local Boards. These Regulations were amended in October 1979 and again in February 1984 to read as they do in Regulation 82-189, when they were amalgamated.

Regulation 82-189 represents a middle-of-the-road position established by the Commission between the requests of Producers and the requests of Forest Industries. For instance, most producers still want automatic Arbitration while many forest industries still do not want Arbitration. Therefore, the Commission has the responsibility to investigate each request for Arbitration. After such investigation the Commission may or may not refer a dispute to an Arbitration Board.

BACKGROUND

There were 10 Negotiating Agencies established in 1978; 15 in 1979; 20 in 1980; 40 in 1982; 50 in 1983; 110 in 1984; 118 in 1985; 126 in 1986; 135 in 1987; 150 in 1988; 160 in 1989, 162 in 1990, and 99 in 1991. It is anticipated that there will be at least as many formal negotiating agencies established in future years.

The increase in numbers of negotiating agencies resulted from: (1) the fact that there are 7 Forest Products Marketing Boards now versus 4 in 1978; (2) the implications in the Crown Lands and Forest Act which gives priority, particularly for softwoods, to pulpwood and logs produced on private woodlots; (3) the importance of the 30% of the forest fibre supply that comes from private woodlots in New Brunswick; and (4) the ruling, by the New Brunswick Forest Products Commission, that mills with a high level of production exceeding 11 000 cubic metres (i.e. 4,000 cunits or 2,000,000 board feet) which normally purchase primary forest products from the private woodlot sector are required to negotiate with the Forest Products Marketing Board(s) in their area. The Commission agreed, as a matter of policy, that if neither party of a Negotiating Agency has made an appointment prior to January 31st that the Commission will no longer make the appointment for them. This eliminated approximately 50 Negotiating Agencies in 1991. In September 1991, for 1992 and subsequent negotiations, the Commission adopted a policy not to established a Negotiating Agency between an Independent Sawmill Company and a Forest Products Marketing Board if neither party establishes one.

In early 1988, the Minister, the Honourable Morris Green and his Department determined allocations of each Local Board's AAC's to each of the Licensees and to almost all of the Sub-Licensees. The Negotiating Agencies Regulation applies to all Licensees and to all Sub-Licensees. REGULATION 82-189 under the Farm Products Marketing Act may be applied to any primary forest product negotiating situation in the Province. It could serve as a model for other jurisdictions.

Therefore, each Licensee and each Sub-Licensee is required to successfully negotiate an agreement with each of the Forest Products Marketing Boards they have normally purchased wood from before the New Brunswick Forest Products Commission may recommend access (within rulings and it's policies relative to these Guidelines) to primary forest products on Crown lands for the next operating season.

The consolidated version of REGULATION 82-189 is basically the same as the seven regulations used in 1982 which were repealed. Therefore, persons who still have copies of previous Regulations should put them aside--i.e. the following Regulations: 78-5; 78-6; 78-7; 78-148; 79-149; 79-153; 79-154; 79-155; 79-156; 79-157; 81-165; 81-199 and 82-186.

As in the past contact with the Commission may be made in writing, phoning or visiting:

The Secretary
New Brunswick Forest Products Commission
Suite 215 - Core section
Hugh John Flemming Forestry Complex
PO Box 6000
FREDERICTON, NEW BRUNSWICK
E3B 5H1

FAX: (506) 457-4966

Phone Number: (506) 453-2196 during office hours or
(506) 472-2533 at other times.

It is also emphasized that during negotiations, all information relating to details of the negotiation supplied to the Secretary will remain **Confidential**.

ADDITIONAL COMMENTS ON THE NEGOTIATION PROCESS

There are three (3) main steps in the negotiation process: Regular Negotiations, Conciliation and Arbitration.

The Commission requests that the readers of this sentence send, to the above address, names of people who would be suitable conciliators or arbitrators.

Regular Negotiations

Most agreements have been reached in the past during Regular Negotiations. Nonetheless, negotiation delays have been very noticeable. Therefore, you should place as much emphasis as possible during negotiations **on reaching an agreement by January 31st of each year**.

BACKGROUND

Conciliation

At this stage a third party enters negotiations. Conciliation may be requested by either party of a Negotiating Agency, i.e. by the Local Board appointees or by the Forestry Industry appointees, at any time after the commencement of negotiations. **After February 1st a Negotiating Agency which has not reached an agreement respecting all matters that it is empowered to settle is required to notify the Commission**.

This is to say a Negotiating Agency, acting jointly for both parties, that has not reached an agreement on all matters which it is empowered to settle, shall so notify the Commission. To facilitate conciliation, it should submit a statement to the Commission, signed by both parties, of the matters still in dispute and also the matters that have been agreed upon. The Conciliator should ensure that this is done.

With the increasing number of Negotiating Agencies there has been an increase in the number of Conciliations. For instance there have been up to 20 Conciliations each year, conducted by at least 5 conciliators. In 1991 there have been only 5 Conciliations by one conciliator to date.

Arbitration

At this stage a three person arbitration board enters the negotiation process if Conciliation is not successful. Either party of a Negotiating Agency may submit a request to the Commission to have the matters in dispute referred to an arbitration board. Practically all requests for Arbitration to date have come from the producer appointees (representatives or party) of the Negotiating Agency. Since 1978 about 100 requests for Arbitration have been made, of these the Commission declined to refer less than 10 cases for Arbitration. Of the remaining nearly 90 cases, which were referred to Arbitration, only 17 were actually Arbitrated--the rest (nearly 70) were settled by the parties before the Arbitration Board met.

The 17 arbitration cases occurred as follows: 1980-1; 1881-2; 1984-2; 1988-3; 1989-4 and 1990-5. Three requests for arbitration were made in 1991 to date. Three referrals to Arbitration been made. Two Arbitrations have been cancelled since agreements were reached. One request is yet to be considered and one Hearing is pending.

It should be noted though that many agreements were reached before a Chairman was named by the Arbitrators appointed by each party.

"Final Offer Selection" is a process that may be used at the Arbitration stage. It has been proposed (on a trial basis) since 1982, but no Negotiating Agency has agreed to try it as yet. A Negotiating Agency may use this process during Negotiations if the Negotiating Agency agrees to do so at it's first meeting(s) and so notifies the Commission of it's intentions. (Also see page 4).

The Role of the New Brunswick Forest Products Commission

In it's responsibility, in overseeing the conducting of Negotiations between Forest Products Marketing Boards and Forest Industry Organizations (or Licensees and Sub-Licensees) for Primary Forest Products (particularly pulpwood and sawlogs) from private woodlots, the New Brunswick Forest Products Commission first requested, in 1978, that an Allowable Annual Cut be determined for each Forest Products Marketing Board. From these AAC's the Minister now allocates portions to each Licensee and also to almost every Sub-Licensee. The Commission also reviews each Negotiating Agency's performance. It may have to determine whether the producer party or the processor party of a Negotiating Agency is acting in "good faith". **I emphasize to you that one of the factors in assessing "good faith" will be whether or not a producer party or a processor party has adhered to the time frames defined in REGULATION 82-189**.

Each case of "good faith" will be judged on it's own merits as well as performance by each party of their contract.

The Secretary of the Commission must maintain direct contact with each Negotiating Agency. The Secretary has appreciated the confidence shared with him by both parties of Negotiating Agencies and wishes to maintain his credibility in this regard. Confidences will remain within the Commission unless written permission from the party extending the confidence is given to the Commission to divulge specific details.

The Commission considers requests for Conciliation, appoints Conciliators, considers request for Arbitration and may or may not refer a dispute to Arbitration.

In addition, the Commission has the responsibility to make recommendations to the Minister of Natural Resources and Energy, **particularly, on or before, March 15th of each year**. At the conclusion of each year's negotiations the Commission reviews that year's negotiations. A review of negotiations is often scheduled for the Commission's July meeting. Prior to that meeting, comments from all parties of all negotiations are often solicited.

Again it is hoped that all negotiations will be conducted on a high plane and in good faith.

J. Ian MacDonald, RPF
Secretary to the
New Brunswick Forest Products Commission

APPENDIX A

APPENDIX A

IMPORTANT DATES

DECEMBER 1st - Appointments to Negotiating Agencies must be completed and the Commission notified in writing of the names and addresses of each appointee.

END OF FIRST FULL WEEK OF JANUARY - Negotiations should have started.

FEBRUARY 1st - Regular negotiations should have been completed.

END OF FIRST FULL WEEK OF FEBRUARY - Each Negotiating Agency must have filed a Report of Negotiations with the Commission itemizing the matters that have been agreed upon and the matters that have not been agreed upon if conciliation is to be requested.

The Commission meets as soon as possible after the first full week of February to consider conciliations. Requests for conciliation received prior to February 1st are acted upon almost immediately.

PRIOR TO THE END OF THE FIRST FULL WEEK OF MARCH - The date, by which the Commission should receive Requests for Arbitration. The Commission meets on a business day on or before March 15th to consider (1) Conciliation Reports and (2) Requests for Arbitration. The Commission then prepares a report for, and makes recommendations to, the Minister of Natural Resources & Energy relative to: (1) the allocations of primary forest products from Crown lands; (2) Conciliations and; (3) Arbitrations.

APRIL 1st - Operating plans are to be signed. Operating Plans include letters of agreements between Licensees and Sub-Licensees.

JUNE 15th - Members appointed to a Negotiating Agency are to remain members until this date, unless DELAYS have been agreed upon by both parties of a Negotiating Agency and the DELAYS been approved by the Commission.

NOTE - ALL DELAYS relative to the above dates or to times within Regulation 82-189, must have the written approval of the New Brunswick Forest Products Commission after being agreed upon by both parties of a Negotiating Agency.
